

## Infinity Video Service

Save on travel expenses and reduce costs with a fully managed video conferencing solution as part of the Global Presence suite of video solutions. Offered in both cloud and premise-based designs, Infinity will free up your organization's resources to focus on core business issues.

### Multi Presence: Premise or cloud-based multipoint video bridging service

- Affordable BYOD service with help desk support
- Managed and monitored service with reports
- Ad-hoc or scheduled video meetings
- H.323 compliant service, HD resolution
- Works with room, desktop and mobile systems

*Ideal for meetings that require three or more participants from multiple office locations*

### Mobile Presence: Multi Presence add-on: Mobile video collaboration service

- Unified user directory for ease of calling
- Reach user on multiple devices with single click
- Live call transfer moves calls between devices
- Invite guests from outside your organization
- Support for over 50 iOS and Android devices

*Enjoy the freedom of mobile video conferencing from anywhere, anytime and from any device*

### Stream Presence: Video streaming, recording and on-demand service

- Stream live conferences or stored assets
- One-touch recording, streaming and publishing
- Text-based chat feature
- User controlled layout for maximum flexibility
- View from Mac, PC, iPhone or iPad

*Webcast important company updates to all employees and record for later on-demand playback*

### IDCloud Options: Advanced management, control, hosting, monitoring, reporting

- Existing endpoint management
- System control
- Firewall traversal
- Equipment hosting in secure data center
- Proactive system monitoring
- Detailed call record and modification reports

*Compliment your Infinity deployment with a variety of options designed to help you derive maximum benefits*

Leverage the power of IDS service offerings to deliver a truly connected video experience. Infinity is the most cost effective and flexible way to deploy your video infrastructure. Its the only fully integrated software platform for both cloud and on-premise video infrastructure deployment and our highly trained staff will provide piece of mind by managing operational and technical aspects through our suite of video services and monitoring tools.
