

# Vidyo + Renovo Software A Comprehensive Video Scheduling Solution

Automates set-up  
and resource  
reservation

Manages  
permissions and  
access levels

Integrates with Vidyo  
and third-party  
components

The VidyoConferencing™ solution makes it easy for end-users to freely join and host conferences without additional support from a system administrator. However, for use cases like recurring and pre-arranged appointments, it's helpful to automate one-time and recurring conferences, and to establish limits to conference access and duration. The Renovo Video Scheduler integrates tightly with Vidyo infrastructure components to bring a feature-rich scheduling and automation solution to your Vidyo deployment.

**Resources reserved. Every conference, every time.**

Instant conflict checking automatically notifies users of other reservations directly in the scheduling interface. Scheduling single, multiple, and recurring reservations is easy. No overbooking; no last-minute room switches; no spreadsheets; no intrusions; no confusion.

- Centralized and end-user scheduling
- Single and Ad-hoc conferences
- Recurring and multi-instance reservations
- Single and multi-tenant support

## You are smart. Your video network should be too.

Easily adjustable configuration settings allow you to automate your video network so you can work smarter, not harder. As your network grows and user demands change, Video Scheduler adjusts to meet your changing needs.

- Easily import and update users and endpoints
- Limit and simplify with user permissions and access levels
- Maximize call uptime with auto redial
- Utilize multiple domain authentication

## Ensure success with a proven solution.

Renovo Video Scheduler is used in some of the world's largest video conferencing networks. Whether your video network is exclusively Vidyo or it includes legacy H.323/SIP devices, Video Scheduler provides an unmatched level of control in a single, easy-to-use interface.

- One-click access to multipoint conferences
- Record and webcast with VidyoReplay
- Secure private conferences with room locks and PIN numbers

Video Scheduler brings important network data to your fingertips, giving you the information you need to identify trends and anticipate your organization's future needs and demand for resources.

- Detailed reports at the touch of a button
- Robust live maintenance tools
- Track usage and capacity statistics
- Fully auditable reservation history

## About the Vidyo + Renovo Solution

The Renovo Video Scheduler software integrates with your Vidyo deployment via the VidyoWorks™ API. Administrators can manage users, tenants, rooms, and reports directly from the Video Scheduler application.

“With Renovo Video Scheduler, we can seamlessly schedule and manage desktops and legacy devices through the same, simple interface.”

— Arlene Salyards, Director of Technology, Northeast BOCES
