General Availability and Anchor Release: VidyoPortal™ and VidyoRouter™ Version 3.3.6

Dear Customer,

Vidyo is pleased to announce the General Availability of VidyoPortal and VidyoRouter version 3.3.6.

Before upgrading to VidyoPortal and VidyoRouter version 3.3.6, please review the Important Notices section of the Release Notes (available from the Reference File link below). In particular, please note that in accordance with the *Vidyo End of Life Process Announcement for Vidyo Server Components Based on ASUS and Supermicro Platforms*, these platforms are no longer under software maintenance. Therefore, if you have these platforms, upgrading to VidyoPortal and VidyoRouter version 3.3.6 will be blocked.

The following list highlights what's new in this release:

- Security Enhancement
 - Adds support for Remote Authentication Dial In User Service (RADIUS), which provides the ability to configure RADIUS authentication for System Console accounts used to authenticate the System Console, SSH, and the VidyoRouter web administration page.
- Fixes a number of issues for improved security, stability, and usability.

In accordance with the Vidyo [Software Maintenance Policy](#), Vidyo is also pleased to announce version 3.3.6 as the current Head of the VidyoPortal version 3.3.x Anchor. Anchor Releases for Vidyo endpoints and servers are marked in green on the Vidyo

Compatibility Matrix. To view this document, click [Compatibility Matrix](#), log in to your account on the Vidyo Support Center, and refer to the Software Compatibility Matrix. Please also note that, as of May 10, 2015, the VidyoPortal and VidyoRouter version 3.0 Anchor is no longer maintained.

Please refer to the Release Notes referenced below for additional details regarding this release.
