General Availability and Anchor Release: VidyoDesktop™ Version 3.6 (027)

Dear Customer,

Vidyo is pleased to announce the General Availability of VidyoDesktop Version 3.6 (027).

The following list highlights what's new in this release:

Multiple Missed Calls Log

- Adds a pop-up that displays a list of all the missed calls. The pop-up displays the date, time, and name of the callers, and allows the user to clear the list.

Active Speaker Icon

- Adds an Active Speaker icon that appears along with the participants' display names at the bottom of the Participants List to indicate which participants are currently the active speakers.

Installer Enhancement

- Controls whether content sharing is disabled or enabled based on the configuration of the MSI installer for Windows® and pList files for Macintosh®.

Security Vulnerability Enhancement

- To enhance security, any change to the WebProxy credentials fields on the Configuration and Status screen will enable the Apply and Save buttons.

Improved Far End Camera Control Experience

- Improves the user experience when controlling a participant's camera by reducing the delay in the camera's response when the user presses and holds a pan, tilt, or zoom button for continuous camera motion.

In accordance with the Vidyo [Software Maintenance Policy](#), Vidyo is also pleased to announce VidyoDesktop version 3.6 as an Anchor Release. Anchor Releases for Vidyo endpoints and servers are marked in green on the Vidyo Compatibility Matrix. To view this document, click [Compatibility Matrix](#), log in to your account on the Vidyo Support Center, and refer to the Software Compatibility Matrix.

Please refer to the Release Notes referenced below for additional details regarding this release.
