

## Virtual Field Trip Service

Are you interested in participating in a virtual field trip but don't have the necessary video conferencing equipment? If so, our virtual field trip service is the solution you've been waiting for. With just a standard PC/MAC, webcam and audio device you can connect to museums, aquariums and other virtual field trip events in just minutes. Our service eliminates the need for dedicated VTC hardware and is affordable for every school.

## From the Rock & Roll Hall of Fame to NASA and everything in between

Imagine taking a trip to the Rock & Roll Hall of Fame without ever leaving the classroom. No more permission slips, costly transportation and looking for chaperones. With an average class size of 30 you can easily spend \$1500 (or more) to host a traditional field trip to a local place of interest. For just \$250 per event you can use our IDVideoPhone service to connect a legacy H.323 based VTC system to your classroom PC/MAC and open the doors to virtual field trip destinations around the world. A webcam, microphone and speakers are all you need to connect to the event - and we can even provide an audio package for an additional daily rental fee. We'll even put you in touch with hundreds of possible events worldwide.

### An Ideal Way to:

- Minimize traditional field trip costs
- Increase number of trips per year
- Reduce school liability
- Expose students to new experiences
- Strengthen class participation
- Make learning more fun

### Hundreds of Possible Destinations:

- Rock and Roll Hall of Fame in Cleveland, OH
- NASA Johnson Space Center in Houston, TX
- Battleship New Jersey in Camden, NJ
- Smithsonian Museum in Washington, DC
- Alaska SeaLife Center in Seward, AK
- Reef HQ Aquarium in Townsville, Australia

## ID Solutions - Leaders in Education

When it comes to providing visual communications to the Educational community, few companies can compete with our video offerings, dedication and customer support. ID Solution's USDLA award winning integration capabilities combine exceptional quality, user simplicity and manageability to make desktop video communications a productive, true-to-life experience. Our IDVideoPhone service delivers SVC based high definition video communications services that are unsurpassed in the industry and fully interoperable with existing H.323 based systems from Lifesize, Polycom and Tandberg - the systems used by virtual field trip sponsors worldwide.

## Virtual Field Trip Service - How does it work?

Select and schedule a field trip from our directory

Connect a webcam, speaker and microphone to classroom PC

Use our IDVideoPhone service to call into the event

Our Help Desk will work with you to test the call

### Select a Virtual Field Trip

Browse the online list of available content or search using keyword, category or program cost. Choose from hundreds of programs are available ranging in price from free to about \$150 per session or purchase one of our bundled packages. Our packages include a set number of field trips per year, camera and audio rental plus access to the IDVideoPhone service.

### Connect Audio and Video Equipment

A webcam, microphone and speakers connected to a standard PC in the classroom is all the equipment required. Since many classrooms already have a projector and audio speakers that are connected to a classroom computer, a simple webcam and microphone can be used to provide audio and video back to the virtual field trip site. We also provide an audio/video equipment rental for a nominal fee per event.

### Login to the Event With Our IDVideoPhone Service

Each virtual field trip location will include instructions and an IP address for accessing their video conference system. You can access the IDVideoPhone system through a web browser (PC or MAC). Simply log into the IDVideoPhone system using the username and password we provide to you and enter in the IP address of the virtual field trip location to connect to the event. Once the event is complete simply log off of the system.

### Help Desk Installation and Support

Each package includes access to our engineering support team in order to assist with setup and operation of IDVideoPhone and your event. Our dedicated team will help you set up a test call prior to the actual event so you can be assured of interoperability on the day of the field trip.

## Package and Ordering Information

IDVideoPhone service can be purchased separately or packaged with a number of pre-paid virtual field trip events. Audio/Video (A/V) equipment rental is also available on a per-event basis. Help desk support available from 8AM to 8PM EST.
