

Video interoperability simplified - Office 365 and Skype for Business

For organizations that have chosen Microsoft Skype for Business as their communications platform, Global Presence is the first service that solves the age-old dilemma of getting different multiple videoconferencing technologies work together.

Simple, Intuitive and Integrated Experience

Global Presence uses the Skype for Business scheduling workflow in Outlook, so it's easy and intuitive for users to schedule a Skype video interoperability call. Skype for Business users join via the familiar click-to-join meeting experience. Standards based video devices may also be configured to join with the Global Presence One Touch Connect offering. Once in the conversation, Skype for Business and standards-based participants will be able to take advantage of an exceptional in-room video experience, including bi-directional content sharing.

Skype for Business integrations allows for:

- **Flexible deployment options** - For organizations not yet standardized on Skype for Business Online as part of Office 365, Global Presence is available in on-premises and hybrid deployments.
- **Leverage existing video investment-** Global Presence allows organizations with existing videoconferencing solutions, including immersive telepresence, to deploy an end-to-end video collaboration solution that centers around Skype for Business.
- **Easy management and provisioning-** Global Presence integrates directly with Microsoft Office 365, allowing administrators to manage and provision licenses from within their Office 365 admin portal. This service is hosted in the Microsoft Cloud and is operated and supported by a dedicated IDSolutions team.

Key Benefits:

- | | | |
|--|---|---|
| <ul style="list-style-type: none"> • Protect existing video investments
Bring existing Polycom, Cisco and other standards-based video systems into Skype for Business meetings | <ul style="list-style-type: none"> • Simple dialing experience
Global Presence supports One Touch Dial, providing the same click-to-join experience to connect to Skype video meetings for select Polycom and Cisco endpoints | <ul style="list-style-type: none"> • Natural user experience
Simplify the experience to schedule, meet, and start Skype for Business calls through scheduling integration with Outlook calendar |
| <ul style="list-style-type: none"> • Flexible deployment options
Global Presence is available for Skype for Business on-premises, hybrid and Office 365 cloud deployments | <ul style="list-style-type: none"> • Easy to manage and provision
