

## The advanced way to collaborate, through a standard web browser

**Global Presence Web Suite** is an innovative and powerful web collaboration solution providing universal access for distributed workforces, enterprise-grade B2B video collaboration, and B2C video conferencing.

## Where and how we work is rapidly changing

People work wherever their creativity and ideas come together. A future without boundaries has arrived, making it possible to defy distance and collaborate regardless of location or whether inside or outside the organization. Flexible workspaces have become the norm. Teams want to innovate and collaborate naturally with rich content sharing capabilities that bring new ideas to life, and integrate with their everyday workflows. A new level of collaboration is here—bringing with it an exceptional voice, video, and content sharing experience all through your web browser—easily and naturally.

### Website is:

- **Flexible** - Global Presence Web Suite lets you arrange impromptu or scheduled meetings by automatically sending invitations including attached documents and a web link for simple click-to-connect convenience.
- **Feature Rich** - Once in the meeting, Web Suite opens a world of collaboration. Advanced features include high resolution multi-stream document share, whiteboard, blackboard, and annotation. Anyone can present and annotate making meetings more interactive and productive.
- **Simple** - With a browser and web camera, Web Suite makes it easy to extend video collaboration to anyone, anywhere on a PC, tablet, or smartphone.

### Key Benefits:

#### • **Simplified meeting invitations**

Invite anyone, anywhere to join using a browser with high quality voice, video, and content sharing

#### • **Content sharing made easy**

Attach multiple documents when organizing meetings or simply upload during the meeting

#### • **Collaboration 3.0**

Anyone can share, compare, and annotate documents simultaneously or can use desktop and application sharing

#### • **WebRTC**

Small meetings are optimized with a WebRTC mesh call, and auto escalate to bridge when needed

#### • **One-touch dialing**

Ideal for both internal and external meetings with access to all your B2B and B2C contacts

#### • **World-class interoperability**

Collaborate seamlessly with others using H.323 mobile, desktop, and room systems while recording the meeting
