tryten

Virtual EHR Assistant

Challenge

EHR Carts are often expensive, heavy and do not cleanly accommodate a range of required accessories to register for patient care including: wrist ban scanner, credit card reader, digital signature pad, web camera for pictures, document/passport scanner and ID badge scanner.

Solution

The Tryten Virtual EHR Assistant is a **non-powered, easy to push-and-position, multi-functional** vehicle supporting EHR Patient Registration. Designed with Tryten's form factor slim profile at an unbeatable price.

Benefits

- Powered by an all-in-one medical grade monitor.

- Saves time, space and improves accessory security.

- Eliminates cord routing issues and reduces trouble-shooting calls.

- Can run a separate brick CPU to a regular monitor of any size if required.
